# HEART OF THE ALIEN

OUT OF THIS WORLD PART II

## STARTING YOUR EXPERIMENT

1. A Genesis controller should be plugged into the "Control 1" port on your Sega Genesis.
2. Make sure that there is no game cartridge in your Sega Genesis System and follow all Sega CD System directions to activate your Sega CD System.
3. Follow Sega CD System directions to open the Sega CD drive from the Sega CD control menu.
4. Carefully place the CD game disc in the Sega CD System with the label side facing up.
5. Close the Sega CD drive from the Sega CD control menu and then select CD-ROM on the control menu to launch the game and begin play.

## CHOOSING THE VARIABLES

As the game loads, the first thing to come up on the screen will be the Sega Logo followed by the Virgin Logo, the Interplay Logo and the Heart of the Alien title screen. After the title screen an options screen will come up. Here you can choose which adventure you would like to embark on, **OUT OF THIS WORLD** or **HEART OF THE ALIEN**. Use the direction pad to highlight your selection then press the START button. The game of your choice will begin with the opening prologue.

Choosing OK at the password screen of **HEART OF THE ALIEN** will take you to the beginning of the game.

## CONTINUING THE JOURNEY

### Direction Pad

**LEFT:** Moves Character to the left.  
**RIGHT:** Moves Character to the right.  
**UP:** Character jumps up to climb.

### Buttons

**A:** Character runs when moving. Shoots a blast of energy if standing still. If you hold the A button down, you can form a super blast as in *OUT OF THIS WORLD I*. Tap the button for a small shot. Hold the button for a protecting force field. Keep holding the button for a Super Blast!

**B:** Controls the WHIP. This is the only weapon you'll have at your disposal throughout the game. So be sure to find it as soon as you can and don't let it out of your grip! As you'll see in the flashback, the whip is energized. Constantly be on the lookout for energy stations where you can recharge your weapon. Use the Direction Pad to aim: You can direct your whip to the right, left or upward. You can not whip downward. Try to get the whip to attach to something overhead and swing!

**C:** Jump forward.

Press the A and C button with the direction pad for a running jump.

**START:** Use this button to start the game. Also, press to pause the action during game-play. Press again to restart the action.

### Save Codes

At certain points in the game, you will be given a code when you lose. You can use this code at any time to return to that particular part of the game and continue playing. To do so, press the **START** button and enter the letters you have been given. Use the directional pad to move the cursor across the letters. Select the letter by pressing the **B** button. Select **OK** when you have entered the code. The game will restart immediately at the stage corresponding to the code you have put in. This system allows you to make progress in the game without having to completely restart it each time you lose.

## THE ADVENTURE BEGAN...

You were Dr. Lester Knight Chaylkin, a young brilliant physicist working on a particle acceleration experiment. An electrical storm caused your experiment to go awry. Suddenly you discovered that you weren't in the safety of your office anymore.

You'd been sucked into a world that's part future, part pre-historical. Unearthly beasts and humanoids roamed the barren land. Yet, modern weapons like laser guns and electrical shields were available.

It was your mission to return to the safety of your home world. You had to battle poisonous leeches, and beasts. Eventually you were knocked unconscious and taken prisoner. Some time later you found yourself with a lump on the head and sharing a suspended cage with a strange looking humanoid. This humanoid aided in your escape and quickly became your "Buddy". Together you crawled through tunnels, swam channels, battled prison guards and evaded the prison's security forces. At the end of Out of This World, you and your buddy had escaped the clutches of the evil warden and flown to safety on the back of a futuristic pterodactyl.

But where are you now?

In Heart of the Alien, Lester and Buddy fly in on the back of the same pterodactyl on which they flew out of Part One. The bird lizard lands in the middle of a small ruined village. Lester is unconscious.

As Buddy lays Lester on a cot to recuperate, he has a flashback. This tiny village was once full of citizens and very prosperous. He was their leader, strong and good. One day, without warning, the village was attacked and destroyed by the guards of the slave prison, led by the humanoid with red eyes. Buddy's loyal pet beast was sent running for his life. Throughout the attack, Buddy used his energized whip to valiantly defend his village. But, eventually he was stripped of his weapon and overcome. He remembers waking up in the same suspended cage with Lester. That was when he first met this strange looking being.

In Heart of the Alien you take on the role of Buddy. It is your mission to return to the prison and rescue the surviving enslaved villagers.

Find and kill the prison warden (the humanoid with red eyes). You must have revenge for his role in the attack on your peaceful village.

All you have to start out with is your strength and your brains. Use them wisely, the future of your village is in your hands.

## SECRETS OF SURVIVAL

As you set out on your mission, you will have only your sense of survival to rely on.

- Find the whip as soon as possible. It's the only weapon you will have.
- Use both your brains and your strength to get you from area to area.
- Use your whip to swing across chasms.
- Keep a lookout for the energizing room/stations. Here is where your whip can be re-energized.
- Look for the bomb.
- Look for the bomb's timer.
- Look for a place where the bomb and timer can be used.

## OUT OF THIS WORLD

## **THE STORY OF LESTER KNIGHT CHAYKIN**

Lester Knight Chaykin jumped into his black Ferrari and sped toward the laboratory. All he wanted was to get to his experiment as quickly as possible. If the changes he had been mulling over all day worked . . . it was almost too much to consider. Ominous clouds and the crackling of a not-so-distant electrical storm filled his ears as he drove. So intent was he on his aims that he hardly noticed. He should have.

Any thoughts of the brewing storm were soon forgotten once Lester stepped into the quiet of the elevator. His slow descent into the lab only built his excitement. Spending some time away from the experiment had given him a better understanding of his previous errors and Lester was sure that his new particle acceleration experiment would be perfect this time.

Impatiently, Lester waited to gain security access to the lab. While the computer slowly matched his DNA, he reviewed once more exactly what he would do. Shuffling through the pizza boxes and other debris that line the floor of his office, he flipped on his computer and quickly typed in his password. After entering the parameters for his new experiment, he sat back and waited as he had done hundreds of times before. Lester cracked a soda while the computer chugged away with the test. So many hours had gone into this project. Had he finally made a breakthrough? Any minute he would know.

Meanwhile, unbeknownst to Lester, the storm had continued to grow. Closer rolled the black clouds, brighter grew the flicker of lightning until suddenly, . . . SNAP! While Lester sat watching his experiment run to perfection, the sky unleashed a tremendous bolt of lightning, slashing through the night air and hitting the laboratory with deadly accuracy. Just as the computer activated the accelerator, the lightning found its way into the system with almost willful precision. Hitting the end of the accelerator the bolt exploded through the wall and struck the very spot where Lester sat. It coiled around him like a python until a massive charge had built. Detonating in a brilliant flash of light, only an empty space was left where Lester used to be.

This system allows you to make progress in the game without having to completely restart it each time you lose.

## YOUR FIRST ENCOUNTER

### WARNING!!!

THIS SECTION CONTAINS HINTS THAT  
GIVE AWAY PARTS OF THE GAME.  
ONLY READ THIS SECTION IF YOU ARE STUCK!

Press up on the directional pad when entering the water to swim to the surface. Once you get to the surface, walk to the right to the next screen. Hostile leeches will fall from the ceiling. You must attack them by kicking to squish them. You can also duck and attack at the same time to squish a leech that is too far away from you. Be careful not to let any land on you.

After squishing all the leeches on the second screen, walk to the next screen to the right. There will be many more leeches to squish. You must squish all leeches on these two screens before proceeding to the next screen to the right.

After entering the fourth screen, walk to the right until the beast attacks. As soon as you see him, move to the left and press the attack button. This will make your player run away. Keep running to the left until you get to the screen with the hanging vine. Keep running up to the edge and jump to the vine. You will hang there for a moment until the vine breaks. Then you will be swung back to the right and land on the next screen. The moment you land start running to the right. Keep running all the way across all the screens. At the end of the last screen you will be saved from the beast by the inhabitants of this world. But they may not be as friendly as they seem.

## SECRETS OF THE OTHER WORLD

IF YOU ARE STUCK, READ THESE HINTS AND THINK IF ANY OF  
THEM APPLY IN YOUR SITUATION.

- Make sure that you do not forget to find and pick up your gun.
- Do not leave your buddy behind.
- There are more ways to kill guards than just shooting them.
- Before leaving the underground city make sure that you save your buddy.
- It is not ALWAYS wise to shoot the guards.
- Deactivate all power circuits.
- You can make a force field with your gun by holding the button for a short time and then releasing it.
- You make a super shot by holding down the button for a longer period of time.

## HANDLING YOUR SEGA CD

- The Sega CD is intended for use exclusively for the Sega CD™ System.
- Do not bend it, crush it, or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other sources of heat.
- Be sure to take an occasional recess during extended play, to rest yourself and the Sega CD Disc.

**KEEP YOUR SEGA CD DISC CLEAN.** Always hold by the edges and keep it in its case when not in use. Clean with a lint-free soft dry cloth-wiping in straight lines from center to edge. Never use solvents or abrasive cleaners.

### Warning to owners of projection televisions
